

PRAKASH BODY CONSTRUCTION COMPANY

Now-a-days many Govt. Agencies, health-care providers, Social service organizations and consumer -related corporations must reach out to the communities and be more accessible to their customers. This trend has created the demand for customized mobile offices, command post, laboratories, clinics, showrooms and more.

At PBC we recognize that every agency, every company has different requirements with regards to vehicle use, size, outfitting and affordability. Because we believe our customers should not have to make compromises, we never retrofit existing recreational vehicles and trailers, we instead work hand in hand with our customers to design and build fully customized, rugged long lasting units from the chassis up.

Over the years, we have developed close relationships with manufacturers of medical diagnostic, laboratory, computer and communications equipment. These partnerships ensure our customers that the specialized sensitive equipment they require will operate at its utmost capability within the units we design. At PBC we remain committed to our customers long after they have taken the delivery of the vehicle. Our goal is to be sure that not only do the vehicles exceed their initial expectations, but that they are satisfied for many years to come.

Ambulances & Emergency Vehicles

about us

An ISO 9001:2000 approved firm setting a landmark in the field of automobile body construction work through developing a series of well engineered Luxury Buses, Luxury Coaches, Cargo Trucks, Ambulance Vans, Semi Sleeper Seats, Sleeper Seats and Compact Series Automobiles.
